

# Clinical Pathology Conference

## **General data :**

年齡：45                      性別：男  
職業：商人  
國籍：台灣  
病歷號碼：2140XXX

Presented by：實習醫學生 鄭荃、王致凱

張舒婷、蘇雅婷、邱靖晴、姜博騰  
林岫萱、許驥今、陳志嘉、顧培馨

Discussed by：病理科                      陳泰迪醫師

放射診斷科                      葉智華醫師

一般外科                      黃燦龍醫師

胸腔外科                      吳怡成醫師

感染醫學科                      林仲甫醫師

放射腫瘤科                      曾雁明醫師

Moderator：病理科                      孫建峰醫師

## **Chief complaint:**

Incidental finding of right lung nodules while follow-up.

## **Present illness:**

This is a 45-year old men who presented to the thoracic clinic with multiple lung nodules (one in the right upper lobe and five in the right lower lobe) approximating 1\*2 cm in size. The patient has a history of splenic sarcoma and has received repeated surgical treatments including splenectomy at the age of 40 years in 2010; recurrent sarcoma in 2011 requiring a distal pancreatectomy; and recurrent sarcoma in 2012 requiring resection of intraabdominal metastases and repairment of the left diaphragm. Physical examination revealed no respiratory distress. His vital sign were stable. The patient underwent a thoracoscopic excision (Right lower lobectomy and wedge resection of right upper lobe) on January 29, 2015. The postoperative course was smooth, and he was discharged 4 days after the procedure. His recovery was uneventful and is now followed up at outpatient clinic.

## **Past history**

Splenic sarcoma rupture status post splenectomy on 2010/08/06, two times intraabdominal recurrence status post excision on 2011/03/08, 2012/01/13

## **Personal history**

No foods or drugs allergy history, DM(-), HTN(-), Smoking(-)

## **Family History**

Not contributory

## **Physical examination**

Vital sign: Normal

Conscious : Clear, Fair looking

Conjunctiva : not pale 、 Sclera : no icterus

Neck : Supple, no lymphadenopathy

**Chest: Symmetric expansion 、 Breathing sound: smooth and clear, no wheezing, no crackle**

Heart: Regular heart beat, no murmur,

Abdomen : Flat and soft, no tenderness, no rebounding pain, normoactive bowel sound

## Review of System

Respiratory: Dyspnea: (no), Wheezing: (no), Cough: (no), Sputum: (no), Chest pain: (no),  
Hemoptysis: (no)

Gastrointestinal: Nausea/Vomiting: (no), Diarrhea: (no), Constipation: (no), Abdominal pain:  
(no), Distension: (no)

Genitourinary: Urgency: (no), Frequency: (no)

Skin: Skin lesion: (no), Rash: (no)

## Lab data

檢驗項目	單位	20150128	檢驗項目	單位	20150128
WBC	1000/uL	10.4	Creatinine	mg/dL	1.07
RBC	million/uL	4.67	BUN	mg/dL	17.9
Hemoglobin	g/dL	13.8	Total Bili	mg/dL	0.6
Hematocrit	%	41.9	ALT/GPT	U/L	21
MCV	fL	89.7	Albumin	g/dL	4.62
Platelets	1000/uL	303	AST/GOT	U/L	24
			ALK-P	U/L	51
			Na	mEq/L	139
			K	mEq/L	4.1
			Ca	mg/dL	9.2

## Image:

To be presented (CT scan of chest, abdomen and pelvis)

## Pathology:

To be presented

---

## ► Points of Discussion:

1. Introduction of splenic sarcoma and splenectomy
2. Evaluation and surgical indications of multiple pulmonary nodules
3. Cryptococcal infection to lung
